Serena®
remote-controlled shades

Experience luxury at an affordable price.

Battery-powered Shades by Lutron

Simple. Affordable. Convenient.

Ultra-quiet Serena® battery-powered shades install wirelessly and can be operated from anywhere in the room using a remote control. These luxury shades—**starting at just \$304**—were designed with your lifestyle in mind.

Two design styles

Available in roller or insulating honeycomb shade styles

Easy to install

Shades install and operate without wires

Low maintenance

Batteries last 3–5 years and can be replaced without taking down the shades*

Fashionable aesthetics

Choose from a wide variety of fabric colors and textures

Cordless design

A safe solution for homes with children or pets

* The batteries will last 3–5 years on a 3' x 5' light-filtering shade, assuming the shade moves up and down twice a day, 365 days a year.

NEW

Roller Shades

A contemporary and stylish window treatment that combines superior functionality with a clean and elegant aesthetic.

- Roller shade sizes available as wide as 96" and as tall as 120"
- Uses 6–8* store-bought D-cell batteries, depending on size
- Choose the headrail option that meets your style needs (fabric wrapped fascia shown)
- Available with or without fabric-wrapped fascia
- Inside or outside mount available

Designer hembar style offers a clean aesthetic that complements the chic look of the roller shade panel

* The batteries will last 3–5 years on a 3' x 5' light-filtering shade, assuming the shade moves up and down twice a day, 365 days a year.

Insulating Honeycomb Shades

A stylish, functional, automated shade that provides convenience, enhances your décor, and saves energy.

- Insulating honeycomb shades can cover windows up to 96" x 96"
- Uses 4–8* store-bought AA or D-cell batteries, depending on size
- Color-matched headrail can be installed on its own, or paired with your own top treatment
- Inside or outside mount available
- Cable-guided shades available for use on doors or windows with heavy airflow

* The batteries will last 3–5 years on a 3' x 5' light-filtering shade, assuming the shade moves up and down twice a day, 365 days a year.

Visual appeal

Block the sun in style. Press one button and shades move in perfect unison, staying aligned across adjacent windows—giving your home a unified look both inside and out.

Roller shades

Product features

Styles and fabrics

With over 75 different fabric options in varying opacities from sheer to blackout, Serena® roller shades transform a space by allowing just the right amount of sunlight into a room. A wide variety of colors, from classic neutrals to vibrant bolds, are available for every taste and application. Unique textures such as two-toned weaves, woven fibers, and delicate linens add to your design choices.

Top treatment options

Roller shade with fascia—
for a complete, finished look

- Fabric-wrapped fascia matches the roller shade fabric

Roller shade without fascia—

for windows that will use a separate, custom top treatment

- Versatile design that works with cornices, swags, drapery, or valances

Easy maintenance

- Innovative headrail simply tips forward to reveal the battery tray — without taking the shade down

Tip down the headrail.

Change the batteries and tip headrail back into place.

Honeycomb shades

Product features

Styles and fabrics

When selecting a Serena® insulating honeycomb shade, you don't need to sacrifice fashion for function. Whether you want to cut glare, add insulation, or block sunlight, you can choose from a beautiful palette of colors and textures that will meet those needs, while adding a signature look to any space.

Fabric options include woven linens and airy sheers, in colors ranging from traditional neutrals to bold hues. Honeycomb shades are also available in several opacities, including light-filtering and room-darkening.

Easy maintenance

Our exclusive Tap n' Tilt™ technology makes changing the batteries a breeze, without ever taking down the shades.

Simply press the release buttons, allowing the headrail to tilt forward.

Change the batteries and snap the headrail back into place.

Insulating honeycomb shades

Effortless energy savings

Lowering shades in the summer prevents the sun's rays from heating up a room, while raising them in the winter captures heat from those rays, helping you save energy and money.

Serena® honeycomb shades capitalize on that energy savings. In fact, they can double the insulation of your windows.

Serena honeycomb shades have pockets that trap air, providing superior insulation when lowered. They come in a variety of styles, and as you can see from the following chart, deliver varying R values depending on the style.

Honeycomb shades

Summer energy savings

Reflect summer sun and keep inside air cooler

Winter energy savings

Prevent heat loss in winter, keeping inside air warmer

Wireless remote control

Control from anywhere in the room

Wireless remote control

A wireless control operates via radio frequency (RF), allowing flexible control of your shades from anywhere in the room. Our wireless remote is ideal for use with shades installed behind a drapery, a valance, or a cornice because the remote's signal doesn't require line-of-sight to the shade for it to operate flawlessly.

You can choose from a single-group Pico® wireless control or a hand-held 4-group remote.

Wireless remote basics

A wireless remote control doesn't need to "see" the shade(s) it's controlling. So you can hold it in your hand, keep it on your table in a pedestal, or even mount it to a wall using an optional faceplate adapter and faceplate. RF signals can travel through anything that isn't metal and will control all shades within a 30 foot range.

Single-group wireless remote control

This option allows you to **control a single shade** or **multiple shades with one button press**.

You can:

- use the Pico® as a hand-held device
- mount it wirelessly to a wall
- place it on a tabletop pedestal

Pico wireless controls on a dual tabletop pedestal

Pico wireless control on a tabletop pedestal

Hand-held Pico wireless control

Pico wireless control in a Claro® wallplate

4-group wireless remote control

This remote allows you to **control up to four groups of shades with one remote control**. A group can be a single shade or multiple shades. You can also create one preset level for each shade group that is programmed to the remote.

This control is only available as a hand-held device and can't be wall-mounted or placed on a pedestal.
